

# Meta Ray-Ban SmartGlasses

## Changing the Voice

This document guides you through the process of changing the voice used by the Meta Ray-Ban SmartGlasses.

**Note 1:** The instructions given in this document have been created using an Apple iPhone 15 Pro, running iOS 26.2. If you are using a later version of iOS, you may find some minor differences. However, it isn't anticipated that you will!

Note 2: The version of the Meta AI app used in the creation of this document was 263.1.0.17.166.

To change the voice used by the Meta Ray-Ban SmartGlasses, follow these steps:

1. Open the Meta AI app.
2. In the Meta AI app, activate the "Devices" tab, situated at the bottom right corner of the screen. Upon doing this, the "Devices" screen will be displayed.
3. In the Devices screen, activate the "Wayfarers..., Settings" button. Upon doing this, the Settings screen will be displayed.

Note 2: If you don't have the Wayfarers model of SmartGlasses, choose the name associated with your glasses instead.

4. In the Settings screen, activate the "Meta AI" button. For reference, this is situated directly beneath the "Experiences" heading. Upon doing this, the Meta AI screen will be displayed.
5. In the Meta AI screen, activate the "Language and Voice" button. Upon doing this, the Language and Voice screen will be displayed.

6. By default, you will find 11 voices available. Others may be available if you have a later version of the Meta AI app installed. There is a button for each voice, which plays a sample of the voice. Activate each of the buttons to find out what they sound like. The last voice you play will become the new voice for your Smart Glasses.
  
7. When you have decided on a voice, activate the "Back" button, situated at the top left corner of the screen. Upon doing this, you will be returned to the Meta AI screen.

That's it, you've successfully changed the voice used by your Meta Ray-Ban SmartGlasses.

If you require further information about your Meta Ray-Ban Smart Glasses, contact the author, Gary Eady, using the following email address.
