

TECHNOLOGY VOLUNTEER

Would you like to use your tech skills to change someone's everyday life?

We're looking for enthusiastic **Technology Volunteers** to support people who are Deaf, hard of hearing, blind, partially sighted and deafblind. By visiting people in their homes, you'll help set up and demonstrate assistive technology - from setting up an Alexa, help with laptop or phone issues, or setting up a new router - empowering individuals to live independently and stay connected to the people and services that matter most.

You don't just install equipment - you unlock confidence, independence and opportunity.

This is a rewarding chance to use your technical know-how and people skills in a role that makes a meaningful difference. You'll gain hands-on experience with specialist assistive technology and work alongside experienced staff for guidance and support.

Step forward. Share your skills. Help someone navigate their world with greater ease and independence.
